THE SOUTH KNOWS "MONARCH"

THE textile industry of the South has known "Monarch" Leather Belting for many years. In the spinning room its steady even pull has won the friendship of many mill owners. We are proud to maintain the reputation "Monarch" has earned for itself.

LONG SERVICE RECORD

The following is a list of superintendents of Southern cotton mills who have a record of 10 years or more continuous service with the mill by which they are now employed:

	Years of Continuous Service	With Present Mill
J. A. Smith, Wahoo Manufacturing Company, Sargent, Ga. (Began as doffer boy in 1873. Superintendent since 1884.)	45	
Wm. Entwistle, Pee Dee Mfg. Co., Rockingham, N. C. (Is now also president of the Entwistle Mfg. Co.)	40	
J. M. Payne, Muscogee Mfg. Co., Columbus, Ga. (Was spinner 10 years. Superintendent since 1892.)	37	
C. E. Romberger, Yocona Mills, Water Valley, Miss.	36	
H. F. Williamson, Am. Net & Twine Co., Anniston, Ala. (Is now manager.)	31	
V. E. Smith, Durham Cot. Mfg. Co., Durham, N. C. (Was clerk 4 years and bookkeeper 9 years. Supt. since 1901.)	30	
John A. Porter, Bibb Mfg. Co., Macon, Ga. (Formerly superintendent of one mill, now general Supt.)	29	
W. S. Morton, Dallas-Cotton Mills, Dallas, Tex. (Began as card boy in 1889. Superintendent since 1904.)	29	
H. B. Greason, Raleigh Cotton Mill, Raleigh, N. C. (Spinner 1 year. Superintendent 27 years.)	28	
W. T. Storey, Modena Cotton Mills, Gastonia, N. C. (Weaver 8 years. Superintendent 17 years.)	25	
C. E. Neisler, Kings Mountain (N. C.) Mfg. Co. (Has also been Supt. of Bonnie Cotton Mills for 17 years.)	24	
M. W. Darby, Cherry Cotton Mills, Florence, Ala. (Shipping clerk 4 years, Asst. Supt. 4 years, Supt. 16 years.)	24	
John H. Vivian, Riverside Mills, Augusta, Ga.	23	
H. C. Robbins, Hadley Peoples Mfg. Co., Siler City, N. C.	23	
D. S. Summer, Randolph Mfg. Co., Franklinville, N. C.	23	
W. A. Marshall, Massachusetts Mills, Lindale, Ga. (With mill since 1895. Superintendent since 1900.)	23	
J. E. Shea, D. E. Converse Co., Glendale, S. C. (Has also been Supt. of Clifton Mfg. Co., since 1895.)	23	
E. A. Hill, Tucapau Mill, Tucapau, S. C. (Oiler 2 years, loom fixer 4 years, weaver 6 years, Supt. 11 years.)	23	
W. A. Fowler, Mallison Braided Cord Co., Athens, Ga.	22	
Jas. Bangle, Proximity Mfg. Co., Greensboro, N. C. (Began carrying water to workmen who dug foundation in 1896. Worked way up to superintendent in 1906.)	22	
J. M. Davis, Newberry (S. C.) Cotton Mills. (5 years weaver, 17 years superintendent.)	22	
E. H. Clippard, Whitney (S. C.) Mfg. Co. (5 years spinner, 17 years superintendent.)	22	
Geo. C. Russell, Franklinville (N. C.) Mfg. Co. (Master mechanic 3 years, other positions 7 years, Supt. 11 yrs.)	21	
W. J. Britton, Spartan Mills, Spartanburg, S. C.	20	
Pascal S. Boyd, Mooresville (N. C.) Cotton Mills.	20	
J. M. Allred, Granite Falls (N. C.) Mfg. Co. (Also had former period of 5 years with same company.)	20	
E. M. Shropshire, Tombigbee Cotton Mills, Columbus, Miss. (Spinner 3 years, carder and spinner 2 years, Supt. 15 years.)	20	
T. A. Sizemore, Am. Spinning Co., Greenville, S. C.	19	
J. C. Ballard, Vivian Cotton Mills, Cherryville, N. C. (Also Superintendent of Howell Mfg. Co.)	19	
Geo. P. Stone, Revolution Cotton Mill, Greensboro, N. C. (Weaver 2 years, superintendent 17 years.)	19	
J. T. Broadway, Pearl Cotton Mill, Durham, N. C. (Weaver 1 year, superintendent 18 years.)	19	
Aubrey Motz, Roswell Mfg. Co., Roswell, Ga. (Is now also president of company.)	19	
Thomas M. Denning, Wiscasset Mills, Albemarle, N. C.	19	
H. H. Boyd, Chadwick-Hoskins Mill, Charlotte, N. C. (Was formerly Supt. of one mill but now general Supt.)	18	
W. E. Bacon, Newton and Clyde Cotton Mills, Newton, N. C.	18	
J. H. Quinlan, Cedartown (Ga.) Cotton & Export Co. (Formerly superintendent, now general superintendent.)	18	
A. Q. Kale, High Shoals (N. C.) Co.	18	
J. S. Bachman, Anchor Duck Mills, Rome, Ga.	18	
Robt. F. Harris, Lowell (N. C.) Cotton Mill No. 2. (10 years in mill before becoming superintendent in 1910.)	18	
M. A. Lay, Lowell (N. C.) Cotton Mill No. 1. (11 year in mill before becoming superintendent in 1911.)	18	
A. M. Dixon, Trenton Cotton Mill, Gastonia, N. C. (6 years as operative and overseer, 12 years superintendent.)	18	
M. G. Stone, Pacolet Mfg. Co., Spartanburg, S. C. (Began as overseer of garning in 1883 and has been with Pacolet Mfg. Co. with exception of 3 years, now general Supt.)	18	
G. D. Barlow, Dillon Mills, Dillon, S. C. (Began as superintendent of one mill, now Genl. Supt.)	18	
W. C. York, Sanford (N. C.) Cotton Mills. (1 year weaver, 17 years superintendent.)	18	
A. L. Quinn, Mary-Louise Mills, Cowpens, S. C.	18	
A. T. Matthews, Thomaston (Ga.) Cotton Mills. (Began as master mechanic, 1900, now general superintendent.)	18	
W. A. Woods, Delgado Mills, Wilmington, N. C. (Designer 1 year, weaver 2 years, superintendent 15 years.)	18	
E. J. Steed, Columbia Mfg. Co., Ramseur, N. C. (Weaver 14 years, superintendent 4 years.)	17	
R. A. Fields, Newnan (Ga.) Cotton Mills.	17	
W. E. Malloy, Strickland Cotton Mills, Remerton, Ga.	17	
A. Sam White, Clayton (N. C.) Cotton Mills.	17	
D. J. Howard, Union Springs (Ala.) Cotton Mills. (Carder and spinner 3 years, superintendent 14 years.)	17	
Geo. Lipe, Linn Mills, Landis, N. C. (In office 3 years, superintendent 14 years.)	17	
W. N. Williams, Lincoln Cotton Mills, Southside, N. C. (Spinner 2 years, superintendent 14 years.)	16	
F. C. White, Lenoir (N. C.) Cotton Mills.	16	
J. H. Brown, Brookside Mills, Knoxville, Tenn.	16	
D. A. Ricks, Mayo Mills, Mayodan, N. C. (Carder 3 years, other departments 3 years, Supt. 10 years.)	16	
J. I. Cain, Knoxville (Tenn.) Cotton Mills. (Carder 4 years, superintendent 12 years.)	16	
W. O. Hedgpeth, Laurel (Miss.) Cotton Mill. (Overseer 15 years, superintendent 1 year.)	16	
W. P. Wingate, Rodman-Heath Mills, Waxhaw, N. C.	15	
C. J. Tarrant, Issaqueena Mills, Central, S. C.	15	
W. C. Cobb, Ware Shoals (S. C.) Mfg. Co.	15	
John T. Carroll, Whittier Mills, Chattahoochee, Ga. (Overseer and assistant superintendent 10 years, Supt. 5 years.)	15	
M. E. Garrison, Glenwood Cotton Mills, Easley, S. C. (Carder 2 years, superintendent 13 years.)	15	
J. E. Gettys, Victoria Cotton Mills, Rock Hill, S. C. (Overseer 3 years, Supt. 10 years, manager 2 years.)	15	
R. F. Craig, Nims Mfg. Co., Mt. Holly, N. C. (Overseer 1 year, superintendent 14 years.)	15	
Charles H. Semple, Louisville (Ky.) G. & B. Mills.	14	
B. B. Hayes, Hudson Cotton Mfg. Co., Lenoir, N. C.	14	
Geo. W. Hamilton, Jr., Crown Cotton Mills, Dalton, Ga.	14	
W. H. M. Woods, Moultrie (Ga.) Cotton Mills.	14	
J. N. Smith, Woodruff (S. C.) Cotton Mills. (Weaver 1 month, superintendent 14 years.)	14	
S. T. Buchanan, Piedmont (S. C.) Mfg. Co. (Served as doffer to second hand in same mill from 1881 to 1890.)	14	
C. N. Steed, Highland Park Mfg. Co., Rock Hill, S. C. (With exception of 4 years has been with present mill since 1891.)	14	
Wm. Hinchliffe, Dallas Mfg. Co., Huntsville, Ala. (Was also superintendent of this mill from 1891 to 1899.)	14	
J. S. Pleasants, Laurel (Miss.) Cotton Mill. (Supt. 1904 to 1917, now general manager.)	14	

(Continued from page 19.)

Some of the Long Service Men

John A. Smith.

John A. Smith, superintendent of the Wahoo Manufacturing Company, Sargent, Ga., holds the record among superintendents for long service with one mill, having been with his present mill for 45 years.

He began for the Wahoo Manufacturing Company very young; his father having been killed in the Civil War, leaving his mother without support, and depending on her children. She moved to the cotton mill, and he began working as a doffer boy, and worked his way up and was made superintendent of the mill in 1884, and in that position he has continued ever since. During his 35 years as superintendent he has lost less than 20 days from work.

Mr. Smith says:

"During my service with this mill I have had numbers and numbers of young men who gave the promise of making very useful textile men, but in almost every instance I have found that these young men wanted to become superintendents in a short time, and began moving from mill to mill. In only a very few instances have they made good, and I believe it was the cause of their rambling disposition. I have always given a good deal of my time studying my help, and have tried to do everything that I could for them, and during my term of office as superintendent of this mill I have never been short of help; having with me now one or two operators that have been with the mill as long as I have. We have a number of hands that have been with us for 25 years.

"I have also gained the confidence of the managers of the mill, and they are always ready to do anything that I ask them. I have accumulated enough for me to live comfortable the balance of my days, but for the love of my work, and the people that I am associated with, I continue as superintendent of this mill, and my advice is to all young men with ambition is to get started with good people, and stick to them,

and I am sure that they will make a success."

William Entwistle.

While the record of John A. Smith exceeds that of Wm. Entwistle, superintendent of the Pee Dee Manufacturing Company for total continuous service, Mr. Entwistle has been superintendent longer than any man in the South. His record is 40 years with one mill and he is still on the job. He has also built the Entwistle Manufacturing Company, of which he is president.

Pascal S. Boyd.

The Mooresville Cotton Mills have been one of the most successful mills in the South and Pascal S. Boyd has been superintendent since February 20th, 1898, or more than 20 years. He says:

"I have had my present position for twenty years, and I have no overseer who has not been with me for more than ten years.

"My observation has been that if a man has the interests of the company at heart, is honest and reliable that the longer he is in your service the more you think of him. On the

other hand, if he is a bluff, bull-dozing and deceiving man, it is only a few years until you have found out and lost confidence in him, and the best thing that he can do is to move.

"You will find, as a rule, that this class of overseers is continually moving.

"I have always made it a rule to select overseers and second hands from my own mills if it is possible to find any material in the mills to make them of. I feel like you are doing your help an injustice to go outside for men to promote if you have any in your employ who could be trained to take the position. The mills are sometimes as much to blame for the moving of the overseers and second hands as the men themselves, because they fail to give the men lower down on the ladder a chance to climb."

S. T. Buchanon.

S. T. Buchanon began with the Piedmont Manufacturing Company, Piedmont, S. C., in 1881 as doffer boy and was advanced to second hand in 1890. He left the Piedmont Manufacturing Company for several years but returned as superintendent in 1904 and has had a successful career of 14 years. He says:

"I think a man ought to start in to make a home when he goes to a mill. He should make his friends among the operatives and the management, and if there is anything to him, he will soon get promoted and make good; then he will have time to go out if he can do better. Money is not the only thing to be considered—the men and home you are leaving and the men and home you are going to. So do not be too quick to change, for if you specialize on one thing and can do that one thing better than any one else, the world will build a path to your door.

The reason men do not succeed more in this world, is that they do not stick to one thing long enough. It is best to settle down and devote your time to one thing, for remember, 'a rolling stone gathers no moss.'"

J. Marion Davis.

J. Marion Davis, president of the Southern Textile Association, entered the employment of the Newberry Cotton Mills as overseer of weaving in 1896 and after five years was promoted to superintendent, which position he has held for 22 years.

W. P. Wingate.

W. P. Wingate, superintendent and secretary of the Rodman-Heath Cotton Mills, Waxhaw, N. C., for 45 years, says:

"In regard to my idea of a man staying on a job for a long time, will say that in the first place a man must be absolutely loyal to the company he is working for, which is the first requisite to long service. In the next place, a superintendent must stay on the job, and not spend his time away from the mill, as his company is paying him a salary to look after their business.

Another thing that is necessary is eternal vigilance, as it is almost an impossibility to run a cotton mill successfully if you don't keep constantly after the many details."

Arthur M. Dixon.

Arthur M. Dixon, vice president of the Southern Textile Association, began his connection with the Trenton Mills as an operative in 1900 and was promoted to second hand, then overseer and finally became superintendent in 1906 and has successfully operated the mill since then.

J. S. Bachman.

J. S. Bachman has been superintendent of the Anchor Duck Mills, Rome, Ga., since it was built in 1900. Mr. Bachman says:

"I stick to my job because I love the work in which I am engaged and the men whom I work for. In the last ten or fifteen years, I have had several offers to change jobs and each offer was for more money than I was getting at that time, but I did not change, because I thought it bad business to do so.

"What would you think of a merchant who moved his store once or twice a year? Do you think that his business would grow? The only difference between myself and the merchant is that I sell my labor and he sells his goods. We all have the blues sometimes, which is only a lesson to be learned and the man who can overcome them becomes stronger by each lesson learned. Little things that once troubled you will not be noticed.

"Any man can desert his job during trouble, but it takes a regular fellow to stick it through. This reminds me of the old story, that there is always a calm after the storm. Men often change positions for more money and oftentimes find that they have made a sad mistake, but it's too late to mend. That is bad judgment which may result in several moves because of the first mistake."

"If you become dissatisfied have a heart to heart talk with your employer, then go off and have a talk with yourself. I'm sure you will feel better and your employer will think more of you. The ship will take on new steam and sail onward. The foundation of a good organization is 'Do unto others as you would have them do unto you.' Make yourself at home and you will have no desire to move elsewhere.

T. A. Sizemore.

From overseer of carding at Padoclet, T. A. Sizemore went to the American Spinning Company as superintendent in March, 1899, and the mill has grown in size during his 19 years' service.

Aubrey Motz.

Aubrey Motz has been superintendent of the Roswell Manufacturing Company since April 1st, 1899, and one year ago was also made president of the company.

W. C. York.

W. C. York went to the Sanford (N. C.) Cotton Mills as overseer of weaving and made good to such an extent that he was promoted to superintendent in 1901 and has held that position for 17 years.

A. Sam White.

A. Sam White went to the Clayton (N. C.) Cotton Mills as carder and spinner in 1901 and was a few months later promoted to superintendent, the position he has held for almost 17 years. He was recently also made treasurer of the company. Mr. White says:

"As a rule a cotton mill man will get more out of life if he settles down and lives in one place. Of course, there is the tendency to get into a rut after he has been with one company a few years and gained their confidence, which usually gives him free rein. If he will keep up with all improvements that others make and not get the idea that he knows everything he will likely steer clear of the rut.

"From the standpoint of prosperity he must stick because the old adage that 'a rolling stone gathers no moss' never had a stronger verification than it has in the cotton mill man. No difference how large his salary he never accumulates until he settles down. There is no ar-

gument from a property standpoint. The greatest advantage is not in the gaining of property, however: A man never takes his proper place in a community until he has lived there several years. The people must know him and he must know the people and their customs before he can hope to attain any prominence in the business, social or religious life of the community and these things play a large part in a man's life.

"Generally speaking, if a man would examine himself and the conditions when he has a good offer to change he will decide that the party making the offer hopes he will be worth more to them than he knows he is worth where he is."

H. B. Greason.

H. B. Greason went to the Raleigh Cotton Mills in 1890 as overseer of mule spinning. One year later he was promoted to superintendent, which position he has held for 28 years.

W. B. Bruton.

W. B. Bruton has been superintendent of the Gibson Manufacturing Company, Concord, N. C., for 11 years and which many efforts have been made by other mills to secure him, he believes that it pays to "stick to your job."

(Continued on Page 9.)

DISCUSSIONS BY PRACTICAL MEN

Qualifications for Second Hands.

Self-Control.

His temper should be under absolute control at all times.

Comment.

The idea that it takes a cursing and fighting man to get others to work, is a very badly mistaken one.

Any rational man would resent such treatment, and a fool that wouldn't do so, is a very poor fool. It is to be admitted that it pays to use methods of camouflage, provided that it can be kept secret. You must consider the most ignorant of the workers as human, very sensitively so. Therefore, whatever is done to camouflage, must be safely guarded from detection.

Under this head, I would advise every overseer, second hand or loom fixer to never worry about anything. Worrying won't do the job. Let the other fellow do the worrying. To worry, is to upset that most vital part of man: viz, the mind. Keep your mind clear. Determine to feel so free that you can actually feel it.

Clean Speech.

He should be honest, tell the truth, and use no profanity.

Comment.

Profanity is uncalled-for and is absolutely unessential in any kind of business. When it is known that you tell the truth, your word will be your bond. A man should be exact in keeping appointments or any other obligations. A disappointment subjects you to criticism, and you will not be trusted in other important matters.

Habits and Morals.

His acts should be beyond the realm of gossip.

Comment.

Don't give anyone a hint that you are any other than exactly straight and law-abiding. Never take a drink of strong spirits. Strong drink will debase a man, and lewd women will cause his ruin. It is he, of whom no man can utter a word of reproach, that surely must rise to the greatest heights.

A Good Mixer.

He should be courteous and friendly to all.

Comment.

The working people, as a rule, look upon a man with contempt, who appears to feel himself above or better than those working under him, or with whom he comes in contact. Friendly acts and courtesy will produce good results. Respect others and you may expect to be respected. It matters not what you may know against a person, you will be repaid wonderfully for your respecting them also.

A Good Worker and Fixer.

He should be up and doing and get them.

Comment.

It takes a loom fixer that will look after his looms and keep them in fix to produce results. He should be a pusher, not a driver. He should hustle, and always be ready to do more than his share. He should not drop his work till done. He should never notice the stopping time whistle. Don't be one of those who rush for the open at the first sound of the closing whistle.

He should be held responsible for production and seconds so far as looms being in fix is concerned. A good worker can inspire others to do more and better work, who would not be affected in any other manner. The help will resent orders from a lazy man, and will rebel, while a well trained man won't have to order a thing done. If you lose sight of these things, you will also lose your chance of becoming second hand, and eventually overseer and superintendent on the day you may be looking for promotion.

Work No Tricks.

Never trick anybody; neither workman nor employer.

Comment.

Never take advantage of your employer in a tight place. If you do, you will very likely pay the penalty eventually. Work for that day you expect to be promoted, and then work to keep that place or better it. We hear some tell of undermining tricks. Don't blacken your name with underhanded tricks. Be fair and just, and you'll do to trust.

Education.

Strive to learn all you can at night.

Comment.

Every man that wishes to build himself up in the mill should not forget that it takes education in mathematics, reading and writing, calculations and many other things. He should take a textile course that he can study at home after work hours if he is not able to go to school. He can understand why this is after he gets to be an overseer. Mathematics is a great brain developer.

Silence.

Keep the under-jaw clamped tight.

Comment.

It won't do to tell everything you know. It would be certain to ruin your reputation, and hurt your business. Don't talk. If you must talk, tell something else.

Religion.

Be a good man.

Comment.

You can fill all the former qualifications and still not be a Christian; but if you practice these things, I believe you will become a Christian. No man should be ashamed to be a Christian. Don't be a fool. There are such folks as fool Christians. They are the kind that are on the extreme and insist that you must be a saint. I think it is impossible to get that far along without God taking us away. I believe in sensible Christianity, which is the kind that permits you to live, move and have your being here in this world.

Dress.

Wear decent clothes.

Comment.

Clothes may not make the man, but it certainly helps his appearance, and appearances will count. Most employers like to see their employees appear clean and neat and properly dressed. This does not mean that you should wear expensive clothes, but that you should have them on right and that they be clean and snappy. Keep yourself clean and neat.

J. M. Freeman.

Kershaw, S. C., June 5, 1918.

Mills Subscribing Limit to W. S. S.

Anderson, S. C.—John B. Humbert, who is director of the War Savings Stamp drive among the cotton mills in Anderson county, has named a committee of men and ladies for each mill. The following is a list of the mills in Mr. Humbert's district that are limit subscribers:

Anderson Cotton Mills,
Belton Cotton Mills,
Brogen Mills,
Chiquola Manufacturing Co.,
Jackson Mills,
Orr Cotton Mills,
Pelzer Manufacturing Co.,
Pendleton Cotton Mills,
Riverside Mills,
Toxaway Mills,
Townsend Cotton Mills,
Williamston Mills.

Electric Storm at Mt. Holly, N. C.

Mt. Holly, N. C.—The Mt. Holly Cotton Mill was in great danger of being burned down Monday morning when a severe electric storm passed over the town and destroyed the residence of O. C. Prior and Rhynes cotton gin was considerably damaged. Presumably a field wire brought in the lightning which would have spread quickly to the communicated to the cotton which wood work.

For a Perch.

A teacher in a lower grade, we read in The Truth Seeker, was instructing her pupils in the use of the hyphen. Among the examples given by the children was the word "bird-cage."

"That's right," encouragingly remarked the teacher. "Now Paul, tell me why we put a hyphen in 'bird-cage.'"

"It's for the bird to sit on," was the startling rejoinder.—Ex.

A Leading Question.

Judge—"Madam, have you anything to say?"

Prisoner's Husband—"Lord, Judge! Now you've done it!"—Ex.

Westinghouse Electric-Drive

From the day the electric drive was first used in the Textile Industry, Westinghouse has kept in touch with every development in textile methods and machinery, and has thus been able to improve existing electrical equipment and devise new and more efficient methods of supplying, distributing, controlling and utilizing power.

Circular 7153

—is a timely publication which should be in the hands of every textile man—particularly those who feel the need of increased efficiency and increased productive power.

WESTINGHOUSE ELECTRIC & MANUFACTURING CO.,
East Pittsburgh, Pa.

W

WESTINGHOUSE
ELECTRIC

Practice in the Big Spinning Mill of the Nantuxen Steam Cotton Co., Salem, Mass.
1. Double Frame Spinning Machine. 2. A "Cotton" Type of Four-Frame Spinning Machine.
3. The Mill's New Frame Spinning Machine. 4. A Four-Frame Spinning Machine. 5. A Four-Frame Spinning Machine.

Westinghouse Service to Textile Manufacturers

ELECTRIC drive is now in general use in textile mills because textile manufacturers have found by experience that it increases production and improves the quality of the goods. These advantages, however, are not the only ones secured through the use of this drive, for in addition it provides greater safety and cleanliness, better lighting, entire freedom as to the arrangement of the machinery, and the ability to operate any of the machines independently of the rest.

In some lines of manufacturing the selection of electrical equipment is a comparatively simple matter, but this is not the case in the textile industry. Textile machines in general perform work of a delicate, complicated nature, and in order to obtain maximum production from them, each one must be provided with a drive that exactly fits its special characteristics. Thus, some must be started abruptly, and others must be started smoothly and easily. Some must be operated at a rigidly constant speed, while with others the speed must be varied at certain points in the process. Some can be readily driven in small groups, but others require individual motors to produce the best results.

Textile motors, therefore, cannot be bought like so much merchandise. No matter how reliable and efficient a given lot of motors may be, they would utterly fail to produce the desired results, unless, in the first place, they were properly designed for the service, and secondly, they were properly applied to the machines they are to drive. Only a manufacturer who has had long experience in building motors for textile purposes can either design or apply them properly; and in consequence, when selecting electrical equipment for his mill, a textile manufacturer should give careful consideration to the qualifications of the organization that is to supply the equipment.

In determining the ability of any organization to perform a given service, the most important factors are its past experience and its present facilities. In both respects, the Westinghouse Electric and Manufacturing Company shows itself able to render the highest service to the textile manufacturer.

Common Air-Blow Cotton Gin, Showing the Simplicity of the Second-Stage Motor Drive.

Program for Wrightsville Meeting.

Everything points toward a large attendance at the Twelfth Annual Meeting of the Southern Textile Association at Wrightsville Beach, N. C., Friday and Saturday of this week. The program is well arranged, interesting addresses on live topics will be heard, and some discussions that promise to be beneficial to all cotton mill men are promised. Some pleasant social features are contained in the program for the meeting, which is as follows:

June 21—Address of welcome, by member of Rotary Club of Wilmington, N. C. Response to address of welcome, by J. H. McDowell, Greensboro, N. C. Annual address by the president, J. M. Davis, Newberry, S. C.; patriotic discussion, "How Can Mill Men Help Win the War?" Discussion leaders: A. M. Dixon, Gastonia, N. C.; F. Gordon Cobb, Greenville, S. C.; Gordon A. Johnstone, Atlanta, Ga., and J. A. Shinn, Sylacauga, Ala.

The afternoon session will be devoted to a discussion of the evils of the present system of soliciting labor and the suggestion of remedies for same. Discussion leader: W. M. Sherard, Caroleen, N. C.; W. P. Hamrick, Columbia, S. C.; J. Wheeler Mears, Monroe, Ga., and Zeb Mangum, Birmingham, Ala. A strong discussion by men who have practical suggestions is earnestly desired. Speeches will be limited to five minutes.

June 22—Address, "Management of Card Rooms," by A. F. Briggs, Camden, S. C.; address, "Selection of Travelers and the Care of Same," by P. A. Smith, Burlington, N. C.; address, "Conserving Coal Pile," by R. P. Bassett, fuel engineer, McNaughton Manufacturing Co.

Doctor's Orders.

Late one night an old colored uncle was found in the preacher's barnyard.

"Why, Uncle Rastus," said the preacher sternly, "it can't be good for your rheumatism to be prowling round here in the rain and cold."

"Doctor's orders, sah," the old man answered.

"Doctor's orders?" said the preacher. "Did he tell you to go prowling round all night?"

"No, sah, not exactly, sah," said Uncle Rastus; "but he done ordered me chicken broth."—Ex.

One day there was a heavy shelling of the French lines just about meal-time, and as a result several pieces of earth got mixed up with the soldiers' food.

The majority of the men were used to hardships, and endured such accidents without notice. A dough-boy, however, who was new to such things, said:

"Well, I expected I was to help France, but I didn't know I should be called upon to eat the whole country."—Ex.

Some of the Long Service Men

(Continued from page 5.)

Thos. M. Denning.

Few superintendents are more highly regarded than T. M. Denning, the veteran superintendent of the Wiscasset Mills, Albemarle, N. C. The mill has had a remarkably successful career and has grown to be one of the largest in the South during the 19 years of his superintendency.

H. C. Robbins.

H. C. Robbins, superintendent of the Hadley-Peoples Manufacturing Company, Siler City, N. C., says:

"I came into the employ of the Hadley-Peoples Manufacturing Co. in 1895, when the corporation was organized, and have been constantly in their employ as superintendent since that time, covering a period of 23 years.

"We started with 1,000 spindles, second-hand machinery, housed in an old wooden shack. We now have a new brick mill, with 9,000 producing spindles and 4,500 twisting spindles, modern in every respect. All built out of profits, liberal dividends having been declared in the meantime. The management of the mill has been liberal towards me. I am better friends than any of his new now receiving for my services near-

ly seven times over the amount of my initial salary 23 years ago.

"I mention the above to show what a man can do by sticking on the job. I have seen many good men lose out by swapping a certainty for a position that proved disastrous. I dare say no superintendent who reads this can point to a family, who has made good by being habitually on the move. The principle as applied to a superintendent is the same, and the result in many cases is equally unhappy.

There may be, and doubtless is, "a time in the affairs of men" which will justify a change, but these cases are the exception. I can conceive of no reason that will stand muster when it comes to excusing a man for failure, when it is evident he has lost out by jumping from pillar to post. Don't forget inducements will always be thrown out—the best place is just ahead, and will always be just ahead—stick on the job."

W. E. Malloy.

W. E. Malloy, speaking from 17 years' experience as superintendent of the Strickland Cotton Mills, Remerton, Ga., says:

"In my experience, I have found in one or possibly two instances where it was to my advantage to change positions. Not for the small extra pay I would draw down on pay day, but because I thought I saw a future before me, a future where my own efforts in work and study, not only would but could be appreciated.

"In these instances, the changes were beneficial. However, I do not think I would have been benefited by these changes had I not applied myself by work and study with the view always in mind to make myself better fitted to manage a mill.

"The executives of a mill do not like to be always changing superintendents. Superintendents do not like to be changing overseers and so on down to the lowest paid jobs. And I find that if a man 'stays on the job' and applies himself and gives his employers the best he has, he will always find the people he better friends than any of his new employers.

"I have been superintendent of this mill for over seventeen years and practically all of my overseers have been with me continually during that time. I try to be fair to my employers and my men and I find with very few exceptions, I get fair treatment in return. The exceptions are always from what are commonly known as 'floating help.'"

D. S. Summer.

D. S. Summer has been superintendent of the Randolph Manufacturing Company, Franklinville, N. C., since March 25, 1895, which gives him a record of slightly over 23 years during which time his mill has been very successful.

M. G. Stone.

M. G. Stone came South in 1883 as overseer of carding at the Pacolet Mill No. 1 and was promoted to superintendent two years later. His long service record was interrupted by becoming superintendent of the Whitney Manufacturing Company from 1897 to 1900, but he has a record of 18 years since he came back to the Pacolet Manufacturing Company. He is now general superin-

tendent of the Pacolet Manufacturing Company and the Gainesville Cotton Mills and is considered by many to be the dean of Southern superintendents.

C. N. Steed.

C. N. Steed has been with the Highland Park Manufacturing Company No. 2, Rock Hill, S. C., since it was organized in 1891 but was away from 1900 to 1903. Since March, 1904, he has been superintendent and has a continuous record of 14 years. He says:

"You could not ask my views on a subject that I would respond to more promptly in the affirmative than that of a man 'sticking' to his job. To my mind, success speaks for itself, and failure demands an explanation. Failures, particularly in the cotton mill industry, are due to the one thing—'changing jobs.'"

Some Ramifications of the Work of the Ordnance Department.

Very few citizens have any conception of the various ramifications of the work of the Ordnance Department, U. S. A., the idea generally prevalent being that it has something to do with guns and ammunition.

As a matter of fact, the Ordnance Department comes in contact and deals with practically every industry in the country and is daily placing orders with firms all over the United States for materials needed or the successful prosecution of the war. These orders cover a wide range and are placed in quantities that are frequently staggering to the average mind. Commodities formerly ordered in hundreds are now ordered in millions, those formerly placed in ounces, now ordered by the ton. A detailed list of the orders placed even for a short period would occupy too much space but it may be of interest to those connected with the textile trade, to learn of some of the items, orders for which are placed by the Ordnance Department with this most important industry:

Olive drab and gray cotton duck, bleached cotton linters for smokeless powder, cotton thread, reverse twist linen thread, cartridge belts, pistol belts, seine twine, sash cord, carriers fabricated for various ordnance material such as pick mattocks, wire cutters, axes and shovels, duck webbed bags, ration bags, feed bags, pockets for cartridge belts, olive drab webbing, jute core halter webbing, bayonet scabbard covers, tubular woven sword scabbard cover, cotton webbing, canteen felt, saddle blankets, four leaf twills, cord of various sizes, thread 10/4 and 10/3 Kingston and Intrinsic silk and soft finish, cotton flannel patches, glazed shot duck, curry comb handles made from webbing, oval lariat webbing, pocket flap webbing, olive brown webbing, unbleached sheeting, sateen combined with rubber compound, osnaburg, linen shoe thread, extension orders for dyeing and finishing textile goods ordered from other firms, medical officers and hospital corps belts, web dispatch cases, canteen hangers and covers, haversacks and pack-carriers, pouch covers, cleaning red cases, pouches for small articles, pouches for first aid, web gun slings, Surcingle, web bridle parts, duck pouches for diagnosis tags, paulins, web gun slings, web watering bridles, horse blankets and covers of various sizes, nose bags, canvas blanket bags, infantry and cavalry fencing plastrons, rifle covers, scabbard knives and forks, suspenders of various kinds, intrenching tool attachments, meat can pouches, various assortments of straps, hangers, flaps, loops, clips, thongs, pockets and billets, hand and rifle grenade aprons and carriers, breech mechanism covers, Chauchat ammunition pouches, scabbards for machetes, recruit travel bags, right and left magazine bandoleers, water buckets, canvas covers for trucks, drill press covers, axle seat cushions, tool wrappers and kits.

An interesting fact in connection with the production of textile ma-

terial for the Ordnance Department is the number of looms now engaged in the manufacture of duck and webbing that were formerly employed exclusively in the weaving of carpets and rugs. The Textile Section, having charge of the placement of orders for this class of material, anticipated a large demand for duck and webbing, and made a search throughout the country for plants having looms capable of being readily adapted to this work. A considerable number were found, changed over and are now weaving duck and webbing in large quantities.

It is doubtful if any one, either in or out of the Textile industry except those closely identified with the purchases, realizes the enormous amount of webbing required by an army. In the course of a year, the Textile Section, Procurement Division, has ordered 200,000,000 yards, or nearly 114,000 miles of webbing, enough to lay four strips around the earth at the equator and more than enough left over to lay an additional strip from San Francisco to Honolulu to Yokohama and back again.

Why Install Humidifiers?

"Why install Humidifiers," asks Mr. Average Millman, "our plant is doing quite well without, has been for years.

Granted! We might add that mills "carried on" for years with hand looms before the automatic machine was invented. But what chance would such a mill have today!

Again we tell you that the Turbo has increased—not "may increase" or "can increase," but HAS increased—production by 3%, 5% in more than 200 mills.

Can you think of any other way of increasing production at so small a cost?

Can you AFFORD to neglect such

an opportunity of lowering the cost of production?

The Turbo is a "sure-thing" proposition. It is "the humidifier with the guarantee" and is installed only in plants where we are sure it will pay for itself many times over. Sounds like philanthropy, doesn't it? It isn't—it's just cold, hard business foresight.

Why not have our Engineers investigate conditions in YOUR mill? They will give you definite figures of cost, etc., for the installation. And remember, this places you under absolutely no obligation.

But the FIRST step is YOUR letter!!!

MORE CONGRATULATIONS

Alabama Cotton Mfgs. Association.
Anniston, Ala.

(Letter of Alabama Cotton Mills.)

June 4, 1918.

As a member of the Executive Committee for Southern Cotton Manufacturers having charge of the fight against the Federal Child Labor Law I can only say that I think the Southern industry is due the thanks and gratitude of the nation because they fought, alone in the face of blind prejudice aroused by paid agitators all over the country. The practical effect in Alabama from the decision of the Supreme Court yesterday is not to reduce the age limit at all, but to allow the children over 14 years to work 60 hours a week. We can now ship our products without fear that they will be seized by some Federal Child Labor Inspector in a distant state on the flimsy charge, whether true or not, that some child without certain evidence of age worked in the mill at one time. I presume it will stop an enormous expense for the maintenance of these inspectors by the Federal Government and release them for some useful employment. It will permit our own Alabama Child Labor Department to function as it should, without interference, and under laws made by our own people to fit our conditions. The menace to the States was further proven by the flood of measures proposed in Congress based upon the principle set up in the Keating law. Just a few of them would have been sufficient to seriously cripple the wheels of industry at a time when their products are essential to the military and civil popu-

lation of most of the world. Our contentions could not have been upheld in stronger language than the following from the majority opinion handed down by Mr. Justice Day:

"If Congress can thus regulate matters entrusted to local authority by prohibition of the movement of commodities in interstate commerce, all freedom of commerce will be at an end and the power of the States over local matters will be eliminated, and thus our system of government be practically destroyed."

Scott Roberts, President,
Alabama Cotton Mfgs. Ass'n.

Clark-Pratt Cotton Mills Co.

Prattville, Ala., June 10, 1918.

Mr. David Clark,
Charlotte, N. C.

Dear Sir:

We wish to express to you our heartiest congratulations upon the recent decision of the United States Supreme Court regarding the Federal Child Labor Law, and wish to thank you most kindly for your efforts in behalf of the mills and their employees.

North Adams, Mass.,
June 10, 1918.

Mr. David Clark,
Charlotte, N. C.
Dear Sir:

Please accept my congratulations along with the thousands of others you will receive from the manufacturers and employees for the efforts you have so faithfully put forth in securing the means and able counsel you got together necessary for the defeat of the Keating bill. Knowing the stand you have always taken against the employment of children in manufacturing plants up to a just age when they should be employed. I have appreciated the intention of your efforts at all times in defeating a bill that was one of

the most drastic in interfering with State rights that was ever placed on the statute books of our country and I hope manufacturers and managers will clearly see what you were so faithfully fighting for and not fail to live up to the laws laid down by their individual States regarding child labor, that will ever bring reproach from outsiders to reflect on you, my dear sir, after the honorable battle you have won with the right motive behind your labor. I hope I have sensed the feeling of all mill men to uphold the honor due you in their behalf.

Yours truly,
J. V. McCombs.

Edna Cotton Mills.
Reidsville, N. C., June 14, 1918.
Mr. David Clark,
Charlotte, N. C.
Dear Mr. Clark:

On account of having been absent I am somewhat late in writing you relative to the decision of the U. S. Supreme Court, confirming Judge Boyd's decision rendered in Greensboro. However, I wish to assure you that it was not through lack of appreciation, and I wish to congratulate you personally and for our company for your untiring efforts in behalf of the cotton mill operatives and companies.

The law, if it had been decided it was constitutional, would have inflicted a great hardship on the mills and the mill operatives, particularly under the present conditions and high prices of necessities. I feel that those interested in cotton manufacturing as a whole, appreciate

your efforts, and will endeavor to further your interests wherever you may be.

With kind personal regards, I am,
Yours truly,
Edna Cotton Mills,
By John F. Scott,
Superintendent.

McAden Mills.
McAdenville, N. C.,
June 18, 1918.

Capt. David Clark,
Charlotte, N. C.
Dear Captain Clark:
This is a rather belated acknowledgement to you personally of my appreciation of the work of your committee which resulted in the decision of the Supreme Court which nullified the Child Labor Law.

The satisfaction over this decision was not confined to mill owners and officials, but was a source of great pleasure to the children themselves, who really prefer to work between school terms rather than lead lives of idleness. Parents were also pleased, aside from the question of earnings, to know that their children had ceased to be street loafers, contracting bad habits from association with

THURSDAY, JUNE 20, 1918

Little Probability of Re-Hearing Keating Law.

The following is an extract from a letter from one of the attorneys who was connected with the test of the constitutionality of the Keating Child Labor Law:

"Under the rules of the Supreme Court, a petition for re-hearing will not be granted or permitted to be argued, unless a justice who concurred in the judgment desires it, and a majority of the Court so determines. It is obvious under this rule that the death of a member of the majority and the appointment of a successor who believed in the constitutionality of the Child Labor Law, would not affect the matter at all; a justice who concurred, that is, one of the original five, must express a desire for a re-hearing.

"On account of the circumstances mentioned in my letter of June 11th I do not believe that there is other than a theoretic and academic possibility that that petition will be granted when the Court convenes in October."

From this it appears that the death of one of the judges would not mean that the case could be re-heard as it can only be re-heard upon motion of one of the judges who held it unconstitutional and there is little probability of any of them changing their minds.

Sticking to a Job.

While no one can blame an overseer or superintendent for leaving one mill and going to another when it really means advancement, we must admit that the tendency towards frequent changing of position is a weakness of the mill men of the South.

In order to call attention to that weakness and at the same time demonstrate that men can be successful and rise by sticking to one mill we decided to issue this "Long Service Number."

On page 3 of this issue will be found a list of 112 superintendents who have each remained with one mill for from ten to forty-five years and it will be noticed that these men are superintendents of many of the most successful mills in the South.

This list is probably not complete but is based upon the best information that we could obtain by going through a directory of 10 years ago and getting the names of every superintendent who was at that time running the mill with which he is now connected.

Unfortunately Clark's Directory of Southern Textile Mills had not been established ten years ago and we

had to rely upon other and less accurate directories.

If there are any who should be in the list and have been omitted we would appreciate being advised of the fact and will give them credit in our next issue.

According to our records about two hundred or one-fourth of the superintendents of Southern mills change positions every year and fully half of those who voluntarily change, regret the move after it is made.

Many of them are hunting another job before they have been at the new mill one day, simply because they have run against problems or circumstances which they do not like.

The spirit of ambition is a great thing and should never be suppressed but it is "wanderlust" rather than ambition that causes a large per cent of the changes.

Some men seem to feel that there is always a job just ahead that is easy and they spend so much time thinking of the other job that they fail to do good work on the one they have and frequently are obliged to move before the other job is in sight.

We are often reminded of the miner who lived alone for many years in a shack in the Rocky Mountains. There was hardly a crevasse in the mountains for many miles that was not marked by his pick in his search for the gold that he never found.

When he finally died they scratched a shallow grave at his door step and uncovered a mine worth millions.

If he had dug at home instead of seeking far off places he would have found the gold he sought, and the same moral will apply to many superintendents and overseers.

The list of 112 names on page 3 shows that many have succeeded by sticking to one job rather than prospecting in many mills.

The man who is offered a better and higher position or a larger mill would be foolish not to change if he can really better his condition and secure advancement thereby but he should first carefully consider all circumstances that surround the new position and decide if they offer him the right opportunity.

We recall one superintendent who had filled one job many years and was regarded as one of the best superintendents in the South. A few years ago he was induced to change and soon discovered his mistake. He has largely lost his reputation and has changed frequently in the past few years.

No man can do successful work

if his mind and his heart is not on his job and such is not the case where he is continually thinking about a new job.

We do not hesitate to advise a man to move if he can really better himself but a study of the list of men with long service records proves that success can be realized by sticking to one job.

Want Names of Honor Men.

Every week the casualty list contains the names of men from Southern mill towns but we have no way of knowing whether or not they are cotton mill boys.

We would appreciate very much being notified of the death or wounding of any former cotton mill boy, or member of a cotton mill family. We would also like to have photographs of such men sent and will see that they are returned in good condition.

We want to do honor to every mill boy who suffers or gives his life for his country in this war and will appreciate the information being sent promptly.

Our Representatives at Wrightsville.

Our representatives at the annual meeting of the Southern Textile Association at Wrightsville on June 21st and 22nd will be David Clark, managing editor; B. Arp Lowrance, associate editor, and J. M. Williams, traveling representative.

Such meetings afford us the pleasure of meeting in person many friends whom we know only by correspondence and we hope that our representatives will have an opportunity of shaking hands with many of them at Wrightsville.

It is probable that Mr. Clark will have to leave on Friday afternoon in order to attend a meeting at Kansas City, Mo., but Messrs. Lowrance and Williams will be present at all sessions.

Meeting of South Carolina Cotton Manufacturers Association.

The annual meeting of the South Carolina Cotton Manufacturers' Association convened at 8:30 p. m. on June 13th at the Battery Park Hotel.

The attendance was unusually small but it is understood that a very live meeting was held. Nothing which transpires in the executive session of the Association is given out, but it was surmised that the question of the violation of the rule against solicitation of labor was under discussion.

At the meeting of Friday morning the question of Reciprocal Insurance was argued before the Association, first by the representative of an insurance company and then by a representative of reciprocal insurance. The meeting adjourned to meet at Spartanburg, S. C., on June 28th, when a further discussion of the labor problem and an election of officers will be held.

Personal News

L. C. Leagan of Bowling Green, S. C., is now card grinder for Baldwin Mills, Chester, S. C.

Ed Harden has recently been promoted to boss carder and spinner at Louderdale Mills, Meridian, Miss.

J. R. Hughes has been promoted to boss carder and spinner at Louderdale Mills, Meridian, Miss.

D. Ballard, from Langley Mills, is now overseer of spinning at Jackson Fiber Company Mills, Bemis, Tenn.

W. B. Varnadore, of High Point, is now carding overseer at night with the Norcott Mills, Concord, N. C.

J. R. Hughes has been promoted to second hand in spinning room No. 3 at Newnan Cotton Mill No. 1, Newnan, Ga.

W. C. Presher, of Greenville, is now fixing looms at Ware Shoals Manufacturing company, Ware Shoals, S. C.

J. L. Trotter has accepted a position as second hand in the weave room at the Mills Manufacturing Co., Greenville, S. C.

J. L. Bobo has resigned as overseer of weaving at Anderson, S. C., to accept a similar position at Union-Buffalo Mills, Union, S. C.

A. T. White, for the past eight years overseer of carding at Rosemary Mfg. Co., Roanoke Rapids, N. C., has resigned his position.

J. L. Bremer has left the Hart Cotton Mills, Tarboro, N. C., and gone to Norwood (N. C.) Cotton Mills, where he has taken position as night superintendent.

J. E. Jolly, formerly assistant master mechanic at Lancaster Cotton Mills, Lancaster, S. C., is now master mechanic at Ashcraft Cotton Mills, Florence, Ala.

A. J. Griffith, an operative in the plant of the Bibb Manufacturing Company, Columbus, Ga., was in some way caught in a warping machine which he was operating and was so badly injured that death resulted the following day.

S. T. Hughes of Beverly Cotton Mills, Middleton, Ga., has accepted the position of master mechanic at Panola Cotton Mills, Greenwood, S. C.

J. W. Kohn is now overseer weaving at Avondale Mills, Humboldt, Tenn. He has been out of the mills some time merchandising but decided to return to mill work.

S. W. Engram, formerly second hand in weave room at Scottdale Mills, Scottdale, Ga., now has a similar position at Monroe Mills, Monroe, Ga.

W. R. Coggins has resigned as spinner at Clinton Cotton Mills, Clinton, S. C., to accept the position of assistant superintendent at Baldwin Cotton Mills, Chester, S. C.

W. L. Lindsay has changed positions from second hand in weaving at the Republic Mill No. 2, Great Falls, S. C., to a like position at Clinchfield Mills, Marion, N. C.

W. R. Smith of Columbus Manufacturing Company, Columbus, Ga., has accepted the position of second hand in cloth room of Glenn-Lowry Manufacturing Company, Whitmire, S. C.

J. B. Fowler changes from overseer of cloth room at Ninety-Six Cotton Mills, Ninety-Six, S. C., to a similar position with the Mills Manufacturing Company, Greenville, S. C.

Thurmond Chatham, son of H. G. Chatham, president of the Inverness Mills, Winston-Salem, N. C., has completed his course of training at the Naval Academy and been assigned to the U. S. S. Mississippi.

Miss Vera Funderburg, employed in the finishing department of the Dixie Mills, LaGrange, Ga., has been notified that her brother, who entered the service from Durand, Ga., has been killed in action in France.

H. M. Miles has resigned his position as overseer of carding and spinning at Alta Vista, Va., and has accepted a position as superintendent of Cedartown Cotton & Export Company, No. 1 Mill, Cedartown, Ga.

ALBANY GREASE

Celebrates its 50th anniversary. During the past half century Albany Grease has always given textile mills a lubrication service of the highest type. It has proven its efficiency and economy in lubricating cards, combers, drawing frames, looms, spinners, twistors, line shafting, motors, etc., in many mills. Write for samples.

ALBANY LUBRICATING COMPANY

708-10 Washington St., New York

T. L. Saunders, Jr., is now superintendent of the Sevier Cotton Mills, Kings Mountain, N. C.

W. P. Dumas, loom fixer at Aldora Mills, Barnesville, Ga., was married May 26 to Miss Cleve Morris of Barnesville, Ga. He is son of H. C. Dumas, overseer of weaving at Barnesville.

Fred L. Still has returned to his former position, overseer of carding at Hermitage Mills, Camden, S. C., having been relieved of military duty after spending two weeks at Camp Jackson.

O. L. Yarborough has resigned his position as overseer of spinning and winding at Greenville, (N. C.) Cotton Mills to accept position as night carder and spinner for Marion Cotton Mills, Marion, S. C.

W. P. Hurt has resigned as superintendent of the Albion Cotton Mills and Mt. Holly Cotton Mills at Mt. Holly, N. C., to return to his former position as superintendent of the Magnolia Mills, Charlotte, N. C.

Col. C. B. Armstrong, of Gastonia, N. C., head of the Armstrong chain of mills, has given \$700 to be used as an endowment for one bed in a Red Cross hospital in France. It takes this amount to pay the expenses of maintaining a bed for a period of one year.

James I. Broadbent, agent and manager of the Meritas Mills, Columbus, Ga., has been elected a director and member of the executive committee of the Standard Oil-cloth Company, owner of these mills. Mr. Broadbent is an active member of the American Cotton Manufacturers' Association, being on its board of directors. He was formerly head of the carding and spinning department of the New Bedford (Mass.) Textile School. He makes his headquarters at 320 Broadway, New York.

M. E. Reid, an employe of Unity Spinning Mills, LaGrange, Ga., has been notified that his son, Private Jewell Reid, was drowned in France on May 21. Private Reid was a former worker at the Unity Spinning Mills and entered the service of his country in March, 1917.

W. M. Patterson, formerly cloth room overseer at Poinsett Mills, Greenville, S. C., is now overhauling looms at Abbeville, S. C.

MILL NEWS ITEMS OF INTEREST

Belton, S. C.—The Belton Mills have ordered from the McNaughton Mfg. Co., of Maryville, Tenn., a complete set of McNaughton grate bars.

Monroe, N. C.—All the houses in the Jackson Mill Company's village are being painted inside and out. Other repair work is also being done.

Monroe, N. C.—The Everett Cotton Mills are installing a sanitary sewerage disposal system in the village. The houses will all be painted in the near future.

Elberton, Ga.—The Hamilton Carhartt Cotton Mills No. 3 are doing quite a bit of improvement around the mill overhauling and painting the houses. They have also built a new dye house.

Pelzer, S. C.—The Pelzer Cotton Mills have installed a complete equipment of McNaughton grate bars after giving them a trial in one of their boilers.

Gonzales, Tex.—The Gonzales Cotton Mills have recently added sufficient carding and spinning machinery to more than double their output. This machinery is furnished by the Saco-Lowell Shops.

Eufala, Ala.—The Glenola Cotton Mill of this city has been sold to Thomas Raby, of Philadelphia, and the new managers have assumed charge. The mill has been owned and operated by Conner Bros. for the last several years. The Glenola Mill, it is stated has enjoyed a most prosperous year.

Dallas, Texas.—Fire recently completely destroyed the plant of Tom B. Burnett & Co., mattress felts, etc., at a loss of \$180,000. The plant is to be started up again as soon as machinery can be procured, it is stated. There were 6 garnetts, 4 pickers, and 2 cards installed at the time of the fire.

Athens, Tenn.—The Liberty Hosiery Mills, recently mentioned as organized by R. J. Fisher of the Athens Hosiery Mill, are erecting a new building, 100x40 feet, which will be ready for occupancy by September 1, it is hoped. There are to be 48 Scott & Williams knitting machines, 12 ribbers, 4 loopers and a number of footers installed at that time. The new company is to be a co-operative concern with the Athens Hosiery Mills, stock to be taken by the working people of both the Liberty and the Athens Hosiery Mills. Men's hosiery 200-needle half hose are to be the product, the goods to be finished at the Athens Hosiery Mills. Lisle 60s two-ply and 40s single splicing yarns will be used. The product will be sold through John M. Given, Inc., of New York. The company has not yet been incorporated.

Blacksburg, S. C.—The Volunteer Knitting Mill, of which Chas. H. Bird is president, J. H. Jacumin superintendent, J. G. Lapoch secretary and treasurer, have a plant of 25 knitting machines for making men's and women's hosiery. They have never operated and wish to sell.

Gaffney, S. C.—At a meeting of the directors of the Gaffney (S. C.) Manufacturing Company, held last Saturday at the First National Bank of Spartanburg, the regular dividend of three per cent together with an extra dividend of two per cent was ordered paid on July 1st, to all holders of the common stock of record on June 25th. The above amounts to a dividend of 5 per cent which will be paid on July 1st.

Marion, N. C.—E. F. Jones, owner of the new Elizabeth James Mills, advises that he will add 10 Scott & Williams knitting machines and 3 ribbers to his equipment at once. He has had 40 knitters in operation since March, producing 200 needle half hose. Combed and carded 16s and 20s yarns are used.

Gastonia, N. C.—Messrs. Rankin and Armstrong, of the Osceola Mill, who recently purchased the Anna Mills at Crowders Mountain, have changed the name of the mill to the Mountain View Mill and converted it into a waste mill. They are running coarse numbers on Comber waste. About 100 employees are at work at this mill.

Macon, Ga.—An increase of capital from \$3,000,000 to \$6,000,000 has been announced by the Bibb Manufacturing Company, of Macon, Ga., this action being to meet war conditions. The Bibb Mills comprise four plants at Macon, two at Porterdale, one at Columbus and one at Reynolds, all in Georgia.

Wilson, N. C.—The Wilson Cotton Mills Company have recently installed three 125 H. P. Economic boilers. Plans are being drawn for a modern community building to be erected this summer. They are also preparing to tear down all old tenant houses and rebuild with a modern construction. Sanitary drinking fountains are to be installed in every department of the mill.

Monroe, N. C.—The new Bearskin Cotton Mills has engaged J. E. Sirrine, Greenville, S. C., to work out all the details of engineering for the machinery and tenements of the mill. The improvements to the plant will consist of the reinforcing of the bays, the laying of maple floors, the building of stairs and closet towers, etc. The machinery has been contracted for with the H. & B. American Machine Company and they have promised to begin loading at their shops by August 1, so that the plant will probably be running by November or December next. The equipment is to consist of 5,000 spindles, producing hosiery yarns.

Madisonville, Tenn.—The Sweetwater (Tenn.) Hosiery Mills have established a branch plant here. Scarcity of labor at Sweetwater was said to be the cause. Into the space which they have procured the company intends to move 40 knitting machines, which have been idle at the main plant for about three or four months, and it is hoped that in the new location, which is about nine miles from Sweetwater, it will be possible to secure sufficient help to keep them busy.

Coal Creek, Tenn.—The Magnet Knitting Mills, Clinton, Tenn., of which Garnett Andrews, of Chattanooga, Tenn., is president, and C. S. Kincaid, of Clinton, Tenn., is manager and treasurer, have let contract for the recently mentioned branch plant to be located at Coal Creek. The building will be about 60 x 200 feet, modern mill construction, with a production of about 1,000 dozen per day, and operated as a gray mill, the entire product being dyed and finished at Clinton, Tenn., and marketed through J. P. Voorhees, 92 Franklin street, New York. The branch mill will have its own steam power plant.

Applaud Child Labor Case Decision.

Kannapolis, N. C.—A large assemblage of the mill employees was congregated at the Y. M. C. A. auditor-

Mr. David Clark, Editor,
Charlotte, N. C.

My Dear Mr. Clark:

Kindly accept my fullest congratulations for having achieved a victory over the child labor advocates. I most highly appreciate the determined stand you took against this unrighteous act to our Southland and thank you very heartily for having so nobly gone "over the top."

You have fought a good fight and with patience have run the race that would, doubtless, have laid a less determined man by the wayside and for having done so I am quite sure you have added strength to your business and ties of friendship between yourself and the Southern manufacturer have been closer drawn.

Yours truly,
John A. McFalls, Supt.

The Victory Manufacturing Co.
Fayetteville, N. C.,
June 17, 1918.

Mr. David Clark,
Charlotte, N. C.
Dear Sir:

The recent decision of the U. S. Supreme Court relative to the National Child Labor Law is gratifying to the textile owners of the South who have been maligned and slandered by unscrupulous labor agitators. It is pleasing, too, to note that our views are shared to a large extent by the intelligent public. I am enclosing quite a clever article contributed by one of our prominent citizens to the Fayetteville Observer by one who has no interest, directly or indirectly, in cotton or other manufacturing. His views are just the expression of a very level-headed man who knows conditions as they exist and who is fitted by experience and observation to refute the charges of theorists and agitators.

The textile industry owes to you a debt of gratitude for your able, efficient and untiring labors in a matter so vitally affecting its own interests, as well as the interests of its employees. I congratulate you.

Very truly yours,
H. W. Lilly,
Vice President.

Efficiency.

The bravery and simplicity of the Indian Babus is proverbial in the British Army. One of these, in the campaign in German East Africa, was in charge of a railway station, where he was besieged by the enemy. This was the wire he sent to headquarters:

"One hundred Germans attacking station. Send immediately one rifle and one hundred rounds ammunition.—Ex.

Had Tried the Cure.

Doctor—"Your throat is in a very bad state. Have you ever tried gargling with salt water?"

Skipper—"Yes, I've been torpedoes six times."—Ex.

CHARLOTTE, N. C.

Joint Meeting Georgia and Alabama Cotton Manufacturers Association at New Orleans

John M. Parker, Louisiana food administrator, delivered the opening address at the convention of the Alabama-Georgia Cotton Manufacturers in New Orleans last Friday morning, his subject being "Cotton After the War." He was followed by Milton H. Fries on "The Industrial and Domestic Coal Problem"; Allen F. Johnson on "Price Fixing on Cotton Goods," and F. B. Gordon, chairman of the war savings committee of the Georgia Milling Industries on "Why Textile Workers of the South Should Buy War Savings Stamps."

E. J. Glenny delivered the address of welcome in behalf of the cotton exchange, and Mayor Behrman for the city. Governor Comer responded for Alabama and W. J. Vereen for Georgia.

The joint convention of the manufacturers of the two States was the first ever held outside the boundaries of their own commonwealths.

The joint gathering decided to make a determined fight for the uniform grading of cotton and for conformity of exchange grades and commercial grades, according to Former Governor Comer, of Ala-

bama.

"As the matter stands at the present time," said Governor Comer, "there is one basis on which all cotton is graded. The unit is the 'middling grade.' There is, of course, the middling of commerce, but there has also been evolved in the exchange another middling. Consequently, the manufacturer in buying, bases his purchases on the 'middling' of commerce. When it is delivered he is likely to find that he has received the middling of the exchange grade, which according to the letter of the law may contain in a single shipment bales of 16 different shades and grades. He is, of course, unable to handle them in his manufacturing. We have taken the matter up with the Secretary of Agriculture and are prepared to go into the highest courts in the land with it.

"The campaign of the Alabama manufacturers," he says, "is aimed at the operations of the New Orleans and New York cotton exchanges, which, according to information furnished by the Alabama Cotton Manufacturers' Association to the Secretary of Agriculture, ap-

parently by agreement killed the intent of the Smith-Lever bill, enacted to maintain safe, equitable conditions in future contracts by rendering on the fulfillment at fictitious prices.

The Alabama Cotton Manufacturers' Association at the close of its joint convention, re-elected its officers as follows: Scott Roberts, Anniston, president; J. J. Bradley, Huntsville, vice president; A. E. Ledyard, Pell City, secretary-treasurer.

The Georgia association also re-elected its former slate—R. C. Freeman, West Point, president; D. A. Jewell, Chickamauga; D. A. Mandeville, Carrollton; E. W. Swift, Columbus, vice presidents; P. E. Glenn, Atlanta, secretary-treasurer.

Lee M. Jordan, attorney of the Georgia association, told members to get ready for the workmen's compensation act in that State. The report of the secretary-treasurer showed 105 mills as members of the Georgia association.

At the joint smoker Friday night the feature was an address by Walter Gordon Merritt, of New York, on

"Labor Unions and the Law," and "Fundamentals of Reconstruction."

The Georgia association committee favorably reported on the recommendation of the president that a committee be appointed to investigate the conditions of mill workers and make suggestions for their welfare.

Both associations were guests on Saturday morning of the cotton exchange for a boat ride on the Mississippi river. A cotton warehouse was also visited.

Dying by Inches.

Seth Woodbury was a tight-fisted old farmer. When his brother William died it was said that Seth had even grudged the money for proper medical care. Seth hitched up and drove to town to have a notice of his brother's death inserted in the local paper.

"There ain't no charges, be there?" he asked anxiously.

"Oh, yes, indeed," answered the editor; "our rate is a dollar an inch."

"Cracky!" muttered the old man; "an' Bill six foot two!"—Ex.

THE PICTURE TELLS THE STORY

Every textile official recognizes the advantages of increased light—of maximum light throughout the mill.

And, he realizes that the use of white, light-reflecting paint contributes more than any other feature toward providing maximum light, which is so necessary for highest efficiency in operation.

But in the purchase of mill white the question of quality, of merit, proven in service, should be given careful consideration.

The use of Sta-White is a definite assurance of maximum service, with minimum yearly painting costs. There is no better proof of the value of Sta-White than its extensive use in the textile field.

STA-WHITE is ideal paint for mill interiors

National War Savings Day June 28th

That's the day we sign up.

That's the day we tell Uncle Sam just how hard we want to win this war. That's the day our government has officially set for us to purchase War Savings Stamps.

On June 28th every man, woman and child in the United States will be called upon to pledge his or her full quota of War Savings Stamp purchases for 1918.

You will be expected to pledge the full amount that you can afford—no more—but by the same token, no less.

In every state, county, city, town and village the War Savings Committees are preparing for this big patriotic rally of June 28th. Unless you have already bought War Savings Stamps to the \$1,000 limit, get busy with paper and pencil and figure out the utmost you can do.

Remember this. You take no chances when you go the limit on War Savings Stamps. They are the best and safest investment in the world. They pay you 4% interest compounded quar-

terly. They can't go below par. You can get back every dollar you put into War Savings Stamps any time you need it. You can turn them in at the Post Office any time for their full value plus interest.

Uncle Sam is asking hundreds of thousands of men to give their lives to their country. He is asking you only to lend your money.

What are you lending?

Cotton Goods

New York.—The chief topic among sellers and buyers is about what the government will do concerning selling prices to army officials and civilians. Numerous plans are outlined and explained by mill men and selling agents as feasible. Some factors prefer to allow matters to take their course. Still others continue openly opposed to the price-fixing method as suggested. They argue that the maximum profits method is the only right and just way of eliminating speculators in yarn and piece goods markets of every description.

Meanwhile, the suggestions and opinions and price schedules of the various members of both manufacturing and selling ends of the business are being received by the members of the committee who will journey to Washington June 21. It is impossible to obtain authentic reports on the contents of the data sent to the committee, but it is said suggestions vary.

With the business as seriously interrupted by the price-fixing agitation this week, it is said to be extremely difficult to estimate the amount of business accepted.

Although it is said there is no imminent danger of prices being fixed before fall, the report that the committee would recommend definitely Oct. 1 for fixing the price of cotton goods gained more credence toward the latter end of the week.

The latent demand is large and will assert itself as soon as mills are ready to accept contracts for the last quarter of the year when price revision by the government begins on staple goods. Some eastern mills have been selling ahead and are willing to accept the prices the government will assent to. Southern mills have been willing to sell goods into September.

Prices have held very steady. Prices named on 32-inch chambrays for the jobbing trades were announced by the largest factors this week and orders are being taken. Sales terms have been fixed at 2-10-60, and goods will be sold without freight allowance, and mill delivery.

A general shortening of terms on all sales is anticipated as it seems to be the purpose of the government not to encourage long contracts on civilian business. The jobbers are holding off in the belief that prices will be lower when government prices are named, and as it had been determined that staple goods for the government and civilian should be sold by manufacturers at the price basis, there is warrent for the lower levels anticipated. Quotations are nominal, as follows:

Print cloths, 28-inch, 64x64s, 14 cents; 64x60s, 13½ cents; 38½-inch 64x64s, 19½ cents; brown sheetings, southern standards, 28 cents; denims, 2.20s, indigo, 37½ cents to 42½ cents; tickings, 8 oz., 45 cents; prints 22 cents; staple gingham 22½ cents; dress gingham, 27½ to 32½ cents.

Less Cotton Used in May.

Washington, June 14.—Cotton consumed during May amounted to 577,288 bales, and for the ten months 5,522,080, compared with 615,412 and 5,676,572 a year ago, the Census Bureau today announced.

Cotton on hand May 31 in consuming establishments was 4,795,497 bales, compared with 4,899,154 a year ago, and in public storage and at compresses 2,464,831 bales, compared with 1,951,042 a year ago.

Cotton spindles active during May numbered 33,720,555, compared with 33,457,356 a year ago.

Imports during May were 29,735 bales and exports, 292,041.

The City of Amiens, which is now so prominently before the eyes of the world in the titanic battle now being fought in France, is known as one of the most important centers of the textile industry in that country. There are manufactured in this city in times of peace, linens, woolens, silks, velvets, threads and cashmeres, etc. It is also a center of food production. Its three main railway lines stretch southwest to Paris, west to Rouen, and Havre, and north along the Somme to the British Channel.

The Yarn Market

Philadelphia.—Inquiries for yarn were plentiful during the past week with an unusually strong demand for yarn from 7's to 40's during the latter part of the week. Sales were rather slow except for a few large government orders. Transportation continues bad and discouraging to yarn dealers and customers.

Price fixing seemed to be the main topic of the week. Spinners are not worrying as they are sold ahead as far as they care to, which is October and November, and are very firm as a matter of price.

Everything seems to be in the spinners favor and in order to get yarn their price must be paid.

One dealer said: "Some of the spinners are sold up until fall, but I very much doubt if all the yarn they sold has been re-sold to manufacturers. There has been speculation in yarn by dealers early in the year."

Another dealer said he had no doubt but the shortage of labor at some places in the South is seriously curtailing production, but he does not think it more than offsets the curtailment of consumption, resulting from labor shortage in the manufacturing districts. He attributes the slow delivery on some contracts to the low price at which they were placed. Another dealer said: "If the government fixes a price on yarn, spinners who are sold up now will have plenty to sell them."

The talk about price fixing increases every week. Men, who a few weeks ago were opposed to it, now say they believe it to be necessary not only to save the government from being fleeced out of millions, but to save the general public. There are varying degrees of profiteering and it is claimed that the manufacturer of cloth, especially makers of goods for civilian consumption are at the head of the list; that there is no limit to their greed. The representative of a Southern spinner said the profits his mills are making on yarn are large, but they are small in comparison with the profits that manufacturers in the South and New England are making on cloth. Prices charged by large department stores, for the various lines of piece goods, are far below a parity with what it will cost the sellers to replace them. Many distributors are selling hosiery and underwear for less than the manufacturers are asking for the same lines at wholesale. What will be the effect on the public when retail prices are generally advanced to a level with the wholesale prices is being asked by some. They answer it by saying unrest, dissatisfaction and demands for higher wages will follow. One man said if the war lasts two or three years longer and the government fails to curb the profiteering, there will be great trouble in this country.

Orders For Cook's Vacuum Card Stripper.

Fred H. White, sales manager for the Anglo-American Co., of Abington, Mass., reports that during the past five weeks he has taken orders from eighteen mills for Cook's Vacuum Card Strippers. Thirteen of the orders were in the South.

Cook's Vacuum Card Strippers have within the past year been installed in a large number of mills both in the North and in the South.

Bobbin Stripping Machines.

The Terrell Machine Co., of Charlotte, reports that an unusually large number of orders have come to them during June for quill cleaning machines. With the present labor shortage mills are installing quill cleaners in order to use the quill cleaning hands in other places.

Are Women More Patriotic.

Mass., June 12, 1918.

Editor Textile Bulletin,
Charlotte, N. C.

Dear Sir:

In your issue of June the 6th I note the amount of Red Cross donations given by the different rooms in the Wiscasset Mills at Albemarle, N. C. I am prompted to ask the question why are the women and children more patriotic than men? We have in this list an example of young American patriotism in each case in the spinning rooms, where the majority of workers are girls and young men. We note they

went "over the top," so to speak with 100 per cent donations; this being the case in only a few other departments where only a few men are employed at excellent wages. The showing on a whole was extremely gratifying in your entire list, but if we men would show the patriotism the young people in our mills and schools are showing and back it up with our means, there would not be the necessity of the great amount of advertising it is taking at each drive to remind us of our duty to our country and the boys who are now fighting for our liberty. Notwithstanding the fact that Massachusetts is the 40th State in the sale of Thrift Stamps the children in this city of less than 30,000 population have turned in figures from the schools showing over \$50,000 sales of stamps to date made by the school children and I have no doubt this is the case in all our schools today all over the country.

Having acted in some capacity on the various committees of these drives, I am watching with interest your weekly articles printed from various Southern mills, and the efforts being put forth in war work. Each week I have the pleasure to read letters from Yanks in Southern cantonments and meet face to face several of them who speak our Southland and their praise of the treatment they are receiving at your hands. The South being my native home, the comment the local papers make of these incidents thrills me to the point of letting your readers know the feeling that is welding the two sections together.

Very truly yours,

Supl.

Boiling Out, Dyeing, Fulling and Washing in One Continuous Operation

COMBINING these operations in our Hustler Continuous Process Machine, saves time, labor and materials, and consequently reduces cost.

Senator Smith Doesn't Favor General Price Fixing.

Washington.—Questioned regarding his views as to fixing prices on the cotton goods manufactured in America, Senator Smith of South Carolina, said he understood that the War Industries Board does not plan to fix prices on finished goods except where the demand for them by the government has caused a marked scarcity.

"As I understand it," he said, "if the government's requirements called for 75 per cent of the total amount of gauze available in the United States, it would deem it advisable for the War Industries Board to fix the price on this particular commodity in order to prevent speculators cornering the remaining 25 per cent available for civilian use and charging exorbitant prices for it. I don't believe there will be any general policy of fixing prices on manufactured cotton goods."

Practical Arithmetic.

A teacher received the following note from the mother of one of her pupils:

Dear Madam: Please excuse my Tommy today. He won't come to skule because he is acting as time-keeper for his father, and it is your fault. U gave him a ixample if a field is 6 miles around how long will it take a man walking 3½ miles an hour to walk 2¼ times around it. Tommy ain't a man, so we had to send his father. They went early this morning & father will walk round the field and Tommy will time him, but pleas don't give my boy such ixamples agin, because my husban' must go to work every day to support his family.—Ex.

The Trouble.

"Yes," said the cynical old sea captain, "when I was shipwrecked in South America I came across a tribe of wild women. Absolutely wild. They had no tongues."

"Good gracious!" exclaimed the listener; "how could they talk?"

"They couldn't," was the reply. "That was what made them wild."—Ex.

Robert Ingersoll wrote a book upon the "Mistakes of Moses." Stone made a speech upon the mistakes of Teddy. Chamberlain made a speech upon the mistakes of the administration. Adam made a speech upon the mistakes of Eve. Teddy made a thousand speeches upon the mistakes of Taft—he will now make one upon the mistakes of Stone—and end the campaign.—Kannapolis Star.

Making Certain.

Little Esther was saying her bedtime prayers and in conclusion asked: "Please, dear God, make San Francisco the capital of California."

"Why did you ask that, Esther?" interrogated her mother.

"Because I wrote it on my examination paper that way."—Ex.

Only the Brave.

Woman—"How did you get that Carnegie medal?"
Tramp—"Heroism, lady. I took it away from a guy that was twice my size"—Ex.

Employment Bureau

The fee for joining our employment bureau for three months is \$2.00 which will also cover the cost of carrying a small advertisement for one month.

If the applicant is a subscriber to the Southern Textile Bulletin and his subscription is paid up to the date of his joining the employment bureau the above fee is only \$1.00.

During the three months' membership we send the applicant notices of all vacancies in the position which he desires.

We do not guarantee to place every man who joins our employment bureau, but we do give them the best service of any employment bureau connected with the Southern textile industry.

WANT position as superintendent of cotton mill. Graduate of Clemson College Textile School, had 18 years' practical experience in cotton manufacturing, ten years as superintendent on a wide variety of goods including ticking, fine lawns, print, sheeting, duck, etc., at present superintendent of mill making tent duck for government, but would change for better position.
